GOALS

We strive to identify and strengthen the strategic areas of our **Customers' value-added services.**

We are a **System Integrator** with whom the Customer can discuss any solution on the market with confidence, knowing that we have the skills and expertise to evaluate new solutions for their organisation.

We develop projects in synergy with the other company Divisions, thus contributing to the **Digital and Ecological Transition of the Country System.**

Customers who choose PH facility's **ICT Division** can count on a team of **highly qualified professionals** ready to take on any technological challenge to ensure the success of highly innovative projects.

PROJECTS

We start by analysing our **Customers' existing business processes,** and then identify, design, and implement appropriate solutions which, depending on the case, may be custom (i.e. created ad hoc), standard (purchased on the market), or hybrid; all our **solutions include software and hardware components, as well as installation, maintenance**, and application and **system assistance.**

We use an **agile or waterfall methodology** to design the architecture of solutions adapted to the specific reference context.
Our projects consist of solutions implemented either on site or in the cloud, in line with the market standards.

SUCCESS CASE
Sanità Campana

In partnership with Telecom Italia and Maticmind, we are taking **part in the digital transformation of several healthcare facilities in the Campania region.** In particular:

- **Consulting for the development of integrated reception solutions,** digital signage, wayfinding, apps to improve communication with doctors and nurses, and new information panels.
- **Planning, design, implementation, and technical support services** for the development of applications related to hospital pharmacy automation.
- **Technical and organisational support** in the field of “telemedicine”.
