PH FACILITY

www.phfacility.com

When does a company become
smart?
when it evolves based on
collective experiences and
styles itself based on actions
there's nothing more disruptive
than a personality

Anna Giuntini,
Sales and Marketing Director

COMPANY

Overview

VALUE AT THE SERVICE OF THE CUSTOMER

PH facility's story is about the **innovation and evolution** of the very concept of service itself. An evolutionary force that has succeeded in converting the Customer's needs into a range of active professional processes, which are perceived as a value rather than a cost. A business reality in the complex world of the industrial services market that poses itself as a **sophisticated multi-purpose tool for Customers** in search of a supplier that's capable of offering an authentic response to their needs, and a partnership based on **trust and transparency**.

And while the cornerstone of this vision is undoubtedly the constant **innovation of its methods and tools**, the company dedicates particular attention to its **human resources**, maintaining relationships based on trust, motivation, and ongoing professional development, never losing sight of what they represent the company's true **driving force** and the heart of all the processes that it offers.

MARKET OFFERING

PH facility's robust structure and widespread organisation allow it to provide a **unique range of** what have come to be known as “**Global Service**” solutions: **Facility Management** for industry, healthcare, and large public complexes, **Maintenance Automation** for cutting edge automation plants, **Environmental Services** complete with recovery solutions in line with the latest European concepts, and **Information Technologies** dedicated to consulting services and custom solutions for efficient business process management.

Thanks to the constant strengthening of its brands, its nationwide presence, and the care it dedicates to the development of its human resources, **PH facility** is consistently able to offer the most **innovative solutions** available on the vast Italian service market.

COMPANY

Overview

HOLISTIC VISION AND BUSINESS INTELLIGENCE

Constant **innovation**, ongoing **training**, and widespread **know-how** among all **PH facility** operators and management constitute the heart and soul of the company itself, where projects are shared at all levels. The **engineering of each work process** and the activation of production units made up of qualified and fully responsible resources allow for rapid, flexible, and proactive activities.

This, coupled with a **global vision of the process**, allows each dedicated operator to anticipate any problems and adapt the workflow, thus resulting in significant **savings in terms of both time and costs**, which instead can be dedicated to the improvement of the service chain offered.

A map of Italy with several white dots indicating the locations of PH facility operational headquarters. The map is set against a green background with a faint grid pattern.

OPERATIONAL HEADQUARTERS

PH facility has learnt to imprint its values in the territories where it not only transfers its operational headquarters and functions but also brings with it the vision of a company capable of assisting its employees and Customers with the parent company style, at all times and no matter what.

COMPANY

Overview

STRENGTH

PH facility has built up its **economic and financial strength** over time in order to tackle market changes, significant new challenges, and increasingly demanding business projects.

It has achieved this strength through **careful cost analysis** and by **training its operators to be responsible and aware** of their roles in designing the most effective solutions, has consolidated it with **negotiation skills** and dialogue, explaining and sharing the values offered to the customer, and ensures its continuity with the **entrepreneurial intuition** that has always allowed it to anticipate the market's demands.

COMPANY

Overview

VISION

PH facility's operational model is directly implemented for Customers in a “tailor-made” manner by engineering the process and implementing it with its own specialised operators. This allows a consistent and full usability of the service as opposed to traditional general contractors who re-commission activities inevitably eroding essential parts of their value.

In fact, PH facility's offer does not stop at the pure implementation of services but **proposes a careful engineering of the services** identified by the Customer with the aim of providing them with an integrated process where the “segments” of the various services are harmonised with each other, thus gaining all the technical advantages of effectiveness and the economic advantages of efficiency.

COMPANY

Overview

SAFETY CULTURE

Safety is productive. This concept inspires the initiatives at the core of our projects, in which the operational procedures and health protocols applied focus on both the functionality of the “**safety system**” as a method and the worker’s awareness of their task’s importance and value to the company. This culture is fostered by **continuous training and the standardisation of the process operations**, and has become a significant aspect of our work and production activities.

PH facility boasts a top-notch “**safety staff**” and is able to rely on the best consultants and market tools available, thus offering its workers all the peace of mind that comes with experience and expertise.

CERTIFICATIONS

In order to ensure the growth of the company and all the stakeholders directly or indirectly involved, **PH facility** is dedicated to disseminating a **culture of quality, environmental respect and protection, and occupational health and safety.**

To achieve this, it is crucial to ensure the continuous improvement of the internal management processes, by operating in accordance with the methods specified by the **integrated quality, environmental, and health and safety management system**, based on the following standards:

ISO 9001:2015: Quality Management System

ISO 14001:2015: Environmental Management System

ISO 45001:2018: Occupational Health and Safety Management System

ISO/EN 27001:2013 Information Security Management System

SA8000:2014: Social Responsibility Management System

EN16636: Pest Management Services

UNI/PdR 125:2022: Gender Equality Management System

COMPANY

Overview

Boasting thirty years of entrepreneurial experience in industrial services with this and other businesses, **PH facility's CEO and founding partner, Anna Giuntini**, has grown the company from a small local business in the 1980s into a nationwide hub of complex industrial activities, with interests that now also extend abroad.

The company's **Administrative and Financial Management** is entrusted to **Germano Chioccioli**, a partner at **PH facility** with extensive experience in the fields of finance and development, who has instilled the company with excellent governance and a sophisticated management model usable by all responsible segments of the company.

Its **Operational Management** is entrusted to **Alessandro Rossi**, who has spent fifteen of his twenty-five years in the services industry with **PH facility**, bringing with him a wealth of experience and leadership to ensure excellent management control of all projects undertaken by the company.
